okemob™
for mobile phone karaoke

USER MANUAL

What is stereomob?

stereomob is your portal to a world of Full Length MP3 Tracks, Polyphonic Ringtones, TrueTones, Sound Effects and Colour Wallpapers, together with full length karaoke tracks through its partner, okemob*.

Featuring access through the specially designed stereomob Player or through the stereomob WAP Site, it's now possible to fully customise your mobile phone on the move.

What is okemob?

okemob is a fantastic application which enables you to sing along to a wide selection of tracks in true karaoke fashion, by playing music together with on-screen lyrics. Why go to a karaoke bar when you can carry one in your phone?!

*Not available for all handsets.

HOW TO ORDER

1. To access stereomob, simply text '**STEREO**' to **80808**

2. You will now receive a reply message with a link, which you should select.

3. You will receive a message asking whether you would like to access stereomob using a player or by using your phone's WAP browser. You should choose the Player first, but if you experience compatibility problems, you should choose the WAP Site instead.

Note that on some phones, instead of receiving this message immediately, you will be automatically directed to your 'Service Inbox'. If this happens, select stereomob from the menu and the message should appear.

If you choose the Player

i. The Player will now be downloaded. A message will appear stating 'application source unknown' or something similar. Select continue if this happens.

ii. Another message will appear asking if you would like to download 'stereomob version 2.5, size 58kb' or something similar. Select continue.

iii. Once downloaded, the stereomob Player will be saved to your phone. You can either access it immediately or access it later.

If you choose the WAP Site

i. Your phone's WAP browser should now start.

ii. You will be automatically directed to the stereomob WAP Site where you will be able to browse through all stereomob products.

HOW TO USE

When using the Player

1. Launch the stereomob Player on your handset. It might be found in 'Applications', 'Multimedia' or something similar.

2. You will now be presented with a menu. To continue, select 'Click to access stereomob'.

3. You will now be presented with another menu:

- okemob Karaoke
- Full Tracks
- Top 10 TrueTones
- Top 10 Polyphonics
- Top 10 Wallpapers
- Top 10 Sound Effects
- My Downloads
- Terms & Conditions

Make a selection according to what you'd like to browse through and follow the on-screen instructions.

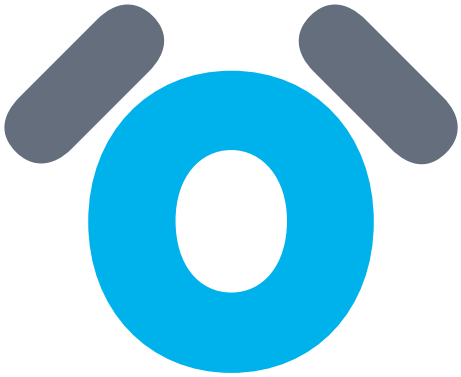

When using the WAP Site

You will be presented with the following menu:

- okemob Karaoke**
- Full Tracks**
- Top 10 TrueTones
- Top 10 Polyphonics
- Top 10 Wallpapers
- Top 10 Sound Effects
- My Downloads
- Terms & Conditions

Make a selection according to what you'd like to browse through and follow the on-screen instructions.

**Note that okemob Karaoke and Full Tracks will not be available to users of the WAP Site.

Frequently Asked Questions

Q. I selected the link in the first message, but couldn't connect - why is this?

A. It might be that:

a. your phone isn't configured for WAP/GPRS (internet) access or
b. your phone *is* configured for WAP/GPRS (internet) access, but isn't able to download and use the Player.

If 'a', you should contact your network operator for assistance. If 'b', you should refer to the original message (see point number 2 under 'HOW TO ORDER') and select the link again. After receiving the options message, you should select the WAP Browser instead of the Player.

Q. I'm getting a message stating 'server time-out'. What should I do?

A. You should try to re-connect. In most cases, this solves the problem.

Q. I ordered an item, but haven't received anything. What should I do?

A. It can take up to 24 hours for an item to be delivered. However, if it remains undelivered after this period, please telephone 0871 750 1030 or email support@stereomob.com

Q. Is this a subscription service?

A. No. You will only receive billed messages if you order an item and your phone number will not be given to any 3rd parties.

Q. How much will I be charged for this service?

A. We will not charge you anything for downloading the service, or for previewing any songs. You will be charged your standard network rates for the initial text message and WAP usage. Apart from this, you will only be charged if you purchase an item.

Q. If I have finished using the service but want to use it in the future, do I have to text 'STEREO' for it again?

A. No. If you used the Player, your handset will have stored it, so you will not need to send another text to order it again. If you used the WAP Site, please refer to the first message you received after sending STEREO to 80808.

Q. What happens when I've finished using an item that I've purchased?

A. All of your purchased items will be stored in the 'My Downloads' folder for future use.
